Brandon Petty

Software Engineer

Full-Stack Web Designer with a background as a professional actor and client-facing event manager utilizing communication and management skills. Combining creative curiosity and an analytical eye to hone coding acumen in a collaborative and supportive team environment.

Web Dev Projects

Recipe Application- Lead Developer

Enables users to create, store and search recipes and has additional features like a login authentication and an administration system. Created using Python/Django and Heroku

Mobile Chat Application- Lead Developer

Developed a real-time communication platform for mobile devices using JavaScript, React Native and Android Studio with the ability to send text and images

Noir Movie Application- Lead Developer

Created a movie app that focuses on noir films allowing users to peruse titles generated on the server-side and save them to personal profiles with a polished user interface. Created using React, MongoDB, Heroku API and hosted in Netlify

Pokèdex App- Lead Developer

The Pokèmon JS App is a simple JavaScript App that utilizes HTML, CSS and JavaScript to load Pokèmon data from an external API to view data points in detail (such as type and size) via the use of modals

Work Experience

July 2010 - July 2022

Multiple Employers | New York City, Spokane, WA

Catering Event Manager

- Planned and facilitated the layout, organization and execution of high-end parties ranging from intimate 10 person dinners to 500 person sit-down dinners
- Supervised the flow of over 1,000 parties and assigned and managed up to 100 staff
- Served as client contact throughout events, both anticipating each client's needs as well as problem-solving solutions when challenges arose

May 2006 - March 2020

Freelance | Seattle, New York City

Actor

- Responsible for analyzing scripts and understanding nuanced content that was then translated into performance
- Memorized scripted content for performance in movies, television, industrial commercials and stage, often with a quick turnaround
- Understanding the hierarchical needs of multiple performance situations with an emphasis on communication for different levels and strata
- Able to work with focus in both solo settings as well as collaborative efforts
- Practice optimizing multiple solutions to creative challenges rather than the first option
